ColoryPaint

The range of paints ColoryPaint is made up of 26 types of paints expressly created to facilitate the work of the professional painter and adapt to his wide range of needs. Therefore, its excellent performance, its docility in application and its high coverage are qualities that our area R+D+i has considered essential in its formulation.

ColoryPaint is a range composed of interior and exterior paints, with multiple finishes and characteristics: matt, satin, vinyl, acrylic, siloxane-based, etc. Furthermore, they do not turn yellow, are non-splash, breathable and washable.

In this way, the professional has at his disposal, an extensive line of paints that allows him to tackle the jobs that require a quick and professional solution to even the most decorative requirements that demand the care of even the smallest detail.

A modern living room interior featuring a light gray modular sofa with several teal and white pillows. A dark, low-profile coffee table sits in front of the sofa, holding a small potted plant and a white cup. The background is a plain, light-colored wall, and the floor is made of light wood. A soft, warm light source from the left creates a bright, triangular glow on the wall behind the sofa. A semi-transparent gray banner is positioned at the bottom of the image, containing the text "ACRYLIC PAINTS." in white, bold, sans-serif capital letters.

ACRYLIC PAINTS.
